About me
I am Highly motivated full stack developer with a passion for web development and a strong foundation in software engineering. Currently pursuing a Bachelor's degree in Software Engineering at Addis Ababa Science and Technology University. Seeking an internship opportunity to apply and further develop skills in web development.

Education:
- Bachelor of Technology in Software Engineering Addis Ababa Science and Technology University, Addis Ababa, Ethiopia

Technical Skills:
- Programming Languages: Python,c++, java
- Web Technologies: HTML, CSS, Django
- Databases: MySQL
- Version Control: Git

Projects:

Library Management System (Capstone Project)
○ Developed a web-based library management system using Django, a Python framework.
○ Implemented features for book cataloging, user management, borrowing and returning books, and generating reports.
○ Collaborated with a team to ensure smooth project execution and timely Delivery.

Unigram (a hackathon project):

- It's a website built by Django, a python framework in coordination with React.js. It also allows students coming from different Ethiopian universities to ask questions based on their department and seek help from their peers. It has a comment section for each post posted by the students. We implemented features like add edit and delete comments.

Courses and Training

- successfully completed GDSC (Google Developer Student Club) study sessions on Django framework. And also won a hackathon project by getting 3rd place from the web team.
- Completed an online course focused on Python programming, enhancing knowledge and skills in the language.

Additional Information:

- Taken Udemy Course: python course,
- Strong problem-solving, teamwork, and communication skills.
